

Web development and Python

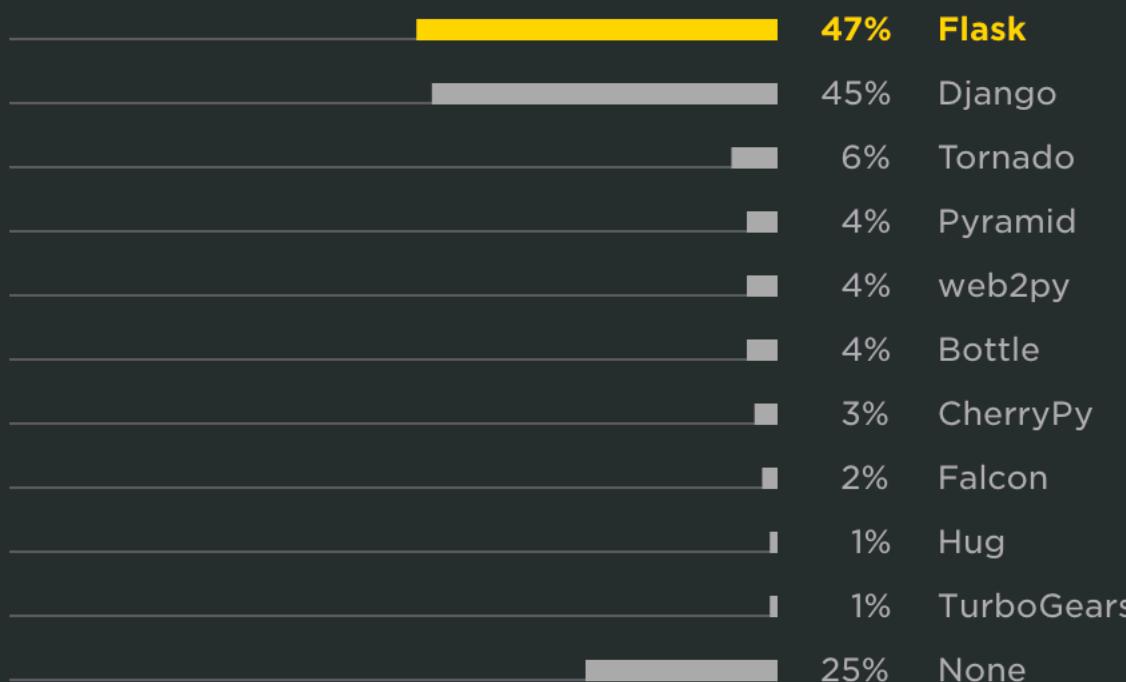

Python web frameworks

Which one should you choose?

Web frameworks (multiple answers)

Surprisingly, compared to the previous year, Flask usage has grown by 15 percentage points among the respondents of our survey and as such, this year Flask has become the most popular web framework. Django was selected by 45% of respondents (41% in 2017).

Our Demo App

The image displays two side-by-side browser windows showing a demo application for a guitar store named "Guitary".

Left Window (Home Page):

- URL: 127.0.0.1:5000
- Content: A large graphic featuring a yellow electric guitar against a background of overlapping orange, red, and pink shapes.
- Header: "GUITARY" with a guitar icon.

Right Window (Guitar Catalog Page):

- URL: 127.0.0.1:5000/guitars/all
- Content:
 - Our custom guitars**
 - Category buttons: All guitars, Electric guitars (highlighted), Acoustic guitars
 - Three guitar cards:
 - Weezer Classic \$1,499** (Electric guitar)
 - Acoustic Black \$1,299** (Acoustic guitar)
 - Nature's Song \$799** (Electric guitar)
- Header: "GUITARY" with a guitar icon, and navigation links: GUITARS, SIGN UP, LOG IN.
